

DISTRIBUTION AND COOPERATION ANNOUNCEMENT

AMIRA Srl has announced M. Braun Inertgas-Systeme GmbH to be the exclusive distributor for their portfolio of V-PHP (Vapour Phase Hydrogen Peroxide) generators in Germany.

Gas purification has been part of MBRAUN's key competence for over 45 years. Over this period, various highly efficient platforms have been developed to remove oxygen and moisture from the atmosphere of inertgas filled enclosures. MBRAUN's yearlong experience in this field allows in addition the removal of airborne particles, solvent vapors and even nitrogen when ultrapure Argon conditions are required.

Being an expert for ultra-pure conditions the next step to offer a comprehensive product line is to sterilize rooms and containments from microorganisms. For this MBRAUN offers now the full Bioreset product range as exclusive distributor for the German market. Manufactured by Amira, Bioreset solutions use vapour-phase hydrogen peroxide as cold sterilising agent for effective and rapid bio-decontamination of containments, equipment and entire rooms.

“The cooperation with Amira is a key element of MBRAUN’s strategy to become an important player in pharmaceutical applications in which ultra-pure and sterile conditions are required. It completes our product line of isolators and containments for operator protection and allows our clients to obtain fully-validated systems for the next generation of sterile OEL6 containments”

- Patrick Bieger, CEO of MBRAUN states

Both companies believe to grow due to this partnership and offer excellent service to the common client base. We look forward to a positive and enriching cooperation!

AMIRA s.r.l.

Amira is a key player in the controlled contamination environment sector. With headquarter in Italy, the company is focused on producing and distributing state-of-the-art instruments for particle and microbiological monitoring suitable for different industries such as life sciences, pharma, university, electronic. Founded in 2003, Amira collaborates with global industry-leading partners to offer the best quality solutions for contamination containment, control, and monitoring. In 2013 Amira started the production of Bioreset, the generator line for H₂O₂ V-Phase bio-decontamination, marketing it worldwide through a network of expert distributors.

M. Braun Inertgas-Systeme GmbH

Having been founded in 1976 as a manufacturer of inert gas glovebox systems, MBRAUN has been expanding its operations into thermal treatment solutions, vacuum coating, operator safety, automated material handling and offers a wide portfolio from standard to entirely bespoke system solutions. With an installed base of more than 25.000 systems, MBRAUN is currently represented in more than 40 countries and relies on the expertise of more than 350 employees working on 4 manufacturing and engineering locations across Europe, North America and Asia.
